The following are requirements for acceptable project(s) for this subject. When selecting a project, please keep in mind that:

1. The project must be a software/IT development project, i.e. it requires writing source code of some sort or customisation of a software system.
2. You are strongly encouraged to use any productivity tools or software libraries, e.g. mobile app builders, or website builders.
3. The project must have a modern database, e.g. relational database such as MySQL.
4. The project must have a modern graphical user interface (GUI), i.e. command-line printout is not a GUI.

The project for this subject offering is:

- Website, desktop or mobile app.
- You are strongly encouraged to study similar services to your project to learn and discover your user stories.
- To get HD mark you need to use modern tools.
- Maximum number of students per team: 3.
